Groynes 1 to 9 refurbish- ment, extension and raising planking levels	Dawlish Warren National Nature Reserve Hazelwood Holiday Park Dawlish Warren			Piling G6, G8, G9 Extensions,			Raise Raise Planking Planking G1—G4 G5—G9			
Construction of New Groynes G10 to G14	Dawlish Warren National Nature Reserve Hazelwood PHoliday Park Dawlish Warren	Overwintering Bird Season	Important bird flocks rest and feed on the beach and mudflats ahead in the 3 hours either side of high tide from August to April. To avoid causing disturbance please continue your walk using only the dune paths during the times listed below. Please remember NO DOGS AT ANY TIME beyond this point 7hank you for your co-operation	BIRDS AT THE WARREN Up to 23,000 wildfowl and wading birds travel to the estuary from the far north to escape the cold each winter. They start arriving in August and stay to late March. Some travel from as far away as Siberial The mudflats and sand spit at Dawlish Warren are vital to the survival of these birds. At low tide the birds feed over the mudflats of the whole estuary. As the tide comes in the birds can no longer feed. They then gather in flocks on areas of higher ground. On higher, or 'spring', tides birds are forced to move to the main beach. It is important that birds are not disturbed when resting on the beach. They can lose energy quickly and disturbance may affect their survival. Please help us to look after the birds by using the path along the dunes (but no dogs please!) instead of the beach when the tide is high. Tide times when visitors should use the dune path are given on other notices and are available at the Visitor Centre. Oystet Cotches	Piling G10—G14	Waling & Planking		Raise Planking G10– G14		Overwintering Bird Season
Removal of Gabion Baskets Groyne 8 to Groyne 14	Dawlish Warren National Nature Reserve Hazalwood Hank Street Control of the Cont	No works to avoid disturbance of Sand Lizards				cation of Lizards				
Hard neck construction works and installation of GeoTube			Vegetation clearance ons works in order to avoid Overwintering Bird Season		ds Translocation of	of Sand Lizards				Overwintering Bird Season
Dredging	Exmouth Sandy Bay Devon cliffs Warren National Nature Reserve Mount Pleasant Inn					edging h migrations Sea Trout)				
Beach Recharge Amenity Area (G1—G4)	Dawlish Warren National Nature Reserve Hazelwood Hazelwood Dawlish Warren Dawlish Warren							Scho	ol Summer Holidays
